

Plan your tessellated tile project

Print this optional worksheet or use it as a checklist. Leave unknown details blank; you can enquire before your design is finished.

1 Your project at a glance

Project suburb / postcode

Area: verandah, path, entrance or other

Help needed: Sydney installation / Australia-wide supply / not sure

Pattern, border and colours you like (or write "not sure")

2 Approximate measurements

Label separate sections A, B, C on your sketch. Write the units beside every measurement. Note bends, steps, doorways and columns.

Section	Length + unit	Width + unit	Borders / corners / notes
A			
B			
C			
D			

Sketch the area and label the measured sections

Planning notes only, not an order quantity or installation drawing. Confirm the final layout, cuts, quantities and spare tiles with your installer before ordering.

Photos, details and your next step

A few clear photos can explain more than a floor-area total. Share what you have; completing this worksheet is not a condition of getting in touch.

3 A useful photo set

☐ The whole area

Show the verandah, path or entrance from enough angles to explain the layout and surrounding brickwork or finishes.

☐ Edges, doorways and changes in level

Include steps, columns, bends, gates and adjoining surfaces. Add close-ups of cracks, loose areas or other concerns.

☐ Existing tiles, if you want a match

Include a close-up and the tile dimensions and thickness where known. Photos alone cannot guarantee a match.

4 Design and delivery notes

Record a pattern or project link you like, preferred colours, border choice and any decorative EN codes. For supply-only, add delivery postcode, timing and any installer tile schedule.

Pattern / project link / decorative tile code

Preferred timing / delivery / access notes

Screen colours are a starting point. Ask about samples and compare them beside the finishes at your property before final selection.

5 Ready to discuss your project?

Send your photos and notes to Joseph, or use the existing online enquiry form. Add your name and phone number so we can discuss the project. Attach files yourself before sending an email.
